

As per mandate by the State of NY, we are required to reduce our onsite workforce to 50%, which we will comply with until the restriction is lifted. It is our number one priority to ensure that our employees are safe and that their wellbeing is preserved to the greatest extent possible during this unprecedented pandemic. We have spread our team members out to maximize the ability to meet our customer needs and requirements as efficiently and effectively as possible.

Most office level positions which include sales, procurement, credit, finance, human resources and IT are working remotely from home. We believe that with minor delays this will function as normal.

Our operational teams are spread across the clock 24 hours a day and we could experience some slower response time, but certainly expect to fill orders in a timely matter. Please stay in contact with your inside/outside representative for any needs that arise and to get any new updates as this is fluid and changes daily and almost hourly. We thank you for your business and your patience during these trying times and together we will all get through this together.

Best Wishes and Health to all of you and yours!

*Michael M. Young*
